PROCESS & COMMUNITY ENGAGEMENT

Key Players

Sustainability Oversight Committee (SOC)

The SOC advises the Town of Brighton on public and private matters that are related to sustainability issues. The SOC consists of residents of the Town of Brighton - one must have professional, energy-related expertise and one must be a business owner. The SOC's role in this project includes:

- Leading the development of the CAP
- Meeting regularly with the consultant
- Reviewing and providing feedback on draft materials
- Providing local knowledge and insight for CAP content
- Guiding the planning and facilitation of public outreach

Inclusion, Diversity, & Equity Advisory (IDEA) Board

The IDEA Board is charged with creating a vision and strategy for encouraging and supporting a more inclusive, diverse, and equitable Brighton community. The IDEA Board's role in this project includes:

- Reviewing and providing feedback on the CAP's Community Engagement Plan
- Reviewing and providing feedback on the draft CAP

To ensure climate justice continues to be advanced through the pursuit of recommended GHG emissions reduction strategies, the IDEA Board is noted as a critical resource in the implementation of the CAP.

Community Engagement Plan (CEP) Winter 2022

- Outlines key project players, types of community engagement activities to be facilitated, and timeline and roles for each activity
- Updated throughout the project process to reflect changing needs and new opportunities

Project Website Spring 2022-Present

- Provides the public with background information on the project, a timeline, events calendar, contact information, project documents, and a learning center with relevant Town and State educational resources
- Updated throughout the project process

Ideas Wall

- Invites community members to post public "sticky note" comments related to climate action in Brighton and to "like," "dislike," and reply to comments from other community members

Interactive Map

- Invites community members to place pins on a map of Brighton to identify and describe climate risks and opportunities, and to "like," "dislike," and reply to map pins from other community members

Public Workshop #1 Spring 2022

- Held on April 5, 2022, via Zoom Webinar
- Introduced the project team, reviewed climate change and the Brighton CAP process, discussed next steps, and demonstrated the Ideas Wall
- Facilitated intermittent Q&A and live polling sessions

Two Public Events Spring & Summer 2022

- Held on June 19 and August 21, 2022, at the Brighton Farmers' Market
- An informational booth provided visitors an opportunity to learn about the project and provide input in a casual environment
- The Spring Public Event included a Climate Walk-About exercise, while the Summer Public Event included a local food systems focus

Two Public Meetings Fall 2022

- Held on October 19, 2022, at the Rustic Village Apartments (western end of Town) and November 2, 2022, at Clover Blossom (eastern end of Town)
- During these two Town Board public meetings, a presentation introduced the project to the public, questions were answered, and attendees were invited to utilize the Ideas Wall and Brighton Climate App and attend future events

Public Workshop #2 Spring 2023 - Today!

Dear Homeacres Residents:

An Informational Meeting for the proposed repair and restoration
to the Homeacres entrance monuments is scheduled for:

August 1st, 2023 at 7:00pm

In the Town Hall auditorium, 2300 Elmwood Avenue.

Town employees will answer any questions regarding the proposed work to
the entrance monuments.

If you are unable to attend and have any questions regarding the proposed
work to the entrance monuments please feel free to contact Evert Garcia at
784-5222 or by email: evert.garcia@townofbrighton.org prior to the meeting.

2023 HWY MAINTENANCE PROJECT
DEWEY AVE (DORSEY RD TO LATTA RD)
ELMWOOD AVE (GOODMAN AVE TO WINTON RD)

JULY 2023

This informational newsletter will provide periodic updates (as needed) on the status of the 2023 Highway Maintenance Project and communicate upcoming construction activities to local residents.

CURRENT PROJECT STATUS

MILLING/PAVING TO BEGIN SOON ON DEWEY AVE

Construction has been underway on the 2023 Highway Maintenance project for around 1 month. The contractor has been working on replacing deficient sidewalk ramps on Dewey Ave to bring them up to current ADA standards. Once the ramp work is completed, existing drainage structures will be adjusted to proper grade and the road will be milled and re-paved. The tentative start date for the milling on Dewey Ave is July 17th (note that electronic message boards will be installed on site a few days prior to the start of the milling operation).

SIDEWALK WORK TO BEGIN SOON ON ELMWOOD AVE

Once the milling operation is completed on Dewey Ave, the contractor will begin work on the Elmwood Ave portion of this project. Similar to the Dewey Ave section, the deficient sidewalk ramps will be replaced, drainage structures adjusted, and the pavement milled and re-paved. It should be noted that after milling, there will be a new lane alignment on Elmwood Ave. A “road diet” is being implemented which will reduce the number of through lanes on Elmwood Ave, while adding a center turn lane and bicycle lanes. A plan of the proposed layout (showing the proposed striping and new bike lane & parking signs) is available on our County website at:

<https://www.monroecounty.gov/dot-construction>.

PROJECT CONTACTS

Contract information for the project team is below. You may contact the Project Resident Engineer, Greg Suraci, to address any concerns you may have during construction. For updated information on this project, and other Monroe County DOT projects, please visit: <https://www.monroecounty.gov/dot-construction>
