Dear Resident,

We are writing to inform you of upcoming utility work scheduled to take place in your area. This work is part of our ongoing efforts to maintain and improve infrastructure to ensure reliable service for all residents. The Allen's Creek Sewer Project aims to remedy issues with the existing sanitary sewer mains in the area noted below. See the attached map for the scope of the project.

**Work Details:**

- **Location:** Along Allen's Creek Road between Brookside Drive and East Ave (NY-96), and backlots in the area of the sanitary sewer main line.
- **Anticipated Start Date:** May 9, 2025
- **Working Hours:** Daytime hours, with minimal late-night work
- **Type of Work:** Site survey, sanitary sewer televising, flow metering
- **Traffic:** Temporary road lane closures may occur during portions of the day. Please follow posted signs and instructions from onsite personnel.

During this time, you may notice an increase in activity, temporary road lane closures, and personnel in wooded areas by Allen's Creek. We will make every effort to minimize inconvenience and maintain access to homes. Individual residents will be notified if work will impact their properties directly.

We appreciate your patience and understanding as we work to improve the utility services in your community. Should you have any questions or concerns, please do not hesitate to contact the Town of Brighton or the project engineer (SWBR).
