

**Expectations of Brighton Community of Gardeners**

The common areas in the garden need to be maintained and it is expected of all the gardeners to participate by selecting a work team and contribute time and effort toward the garden upkeep. The time requirement is approximately 4 hours over the season, and it can be fulfilled by participating in a community workday.

Over the years the community workdays have been a wonderful way to bring together our gardeners to work together and make connections.

Each season we expect gardeners to participate in at least one community garden workdays. Dates are announced annually.
